¿POR QUÉ?

**LA EDUCACIÓN ACTUAL MATA LA
INICIATIVA DE LAS PERSONAS Y SU
CAPACIDAD CREATIVA**

The Thiel Fellowship gives \$100,000 to young people who want to build new things instead of sitting in a classroom.

A different path for everyone

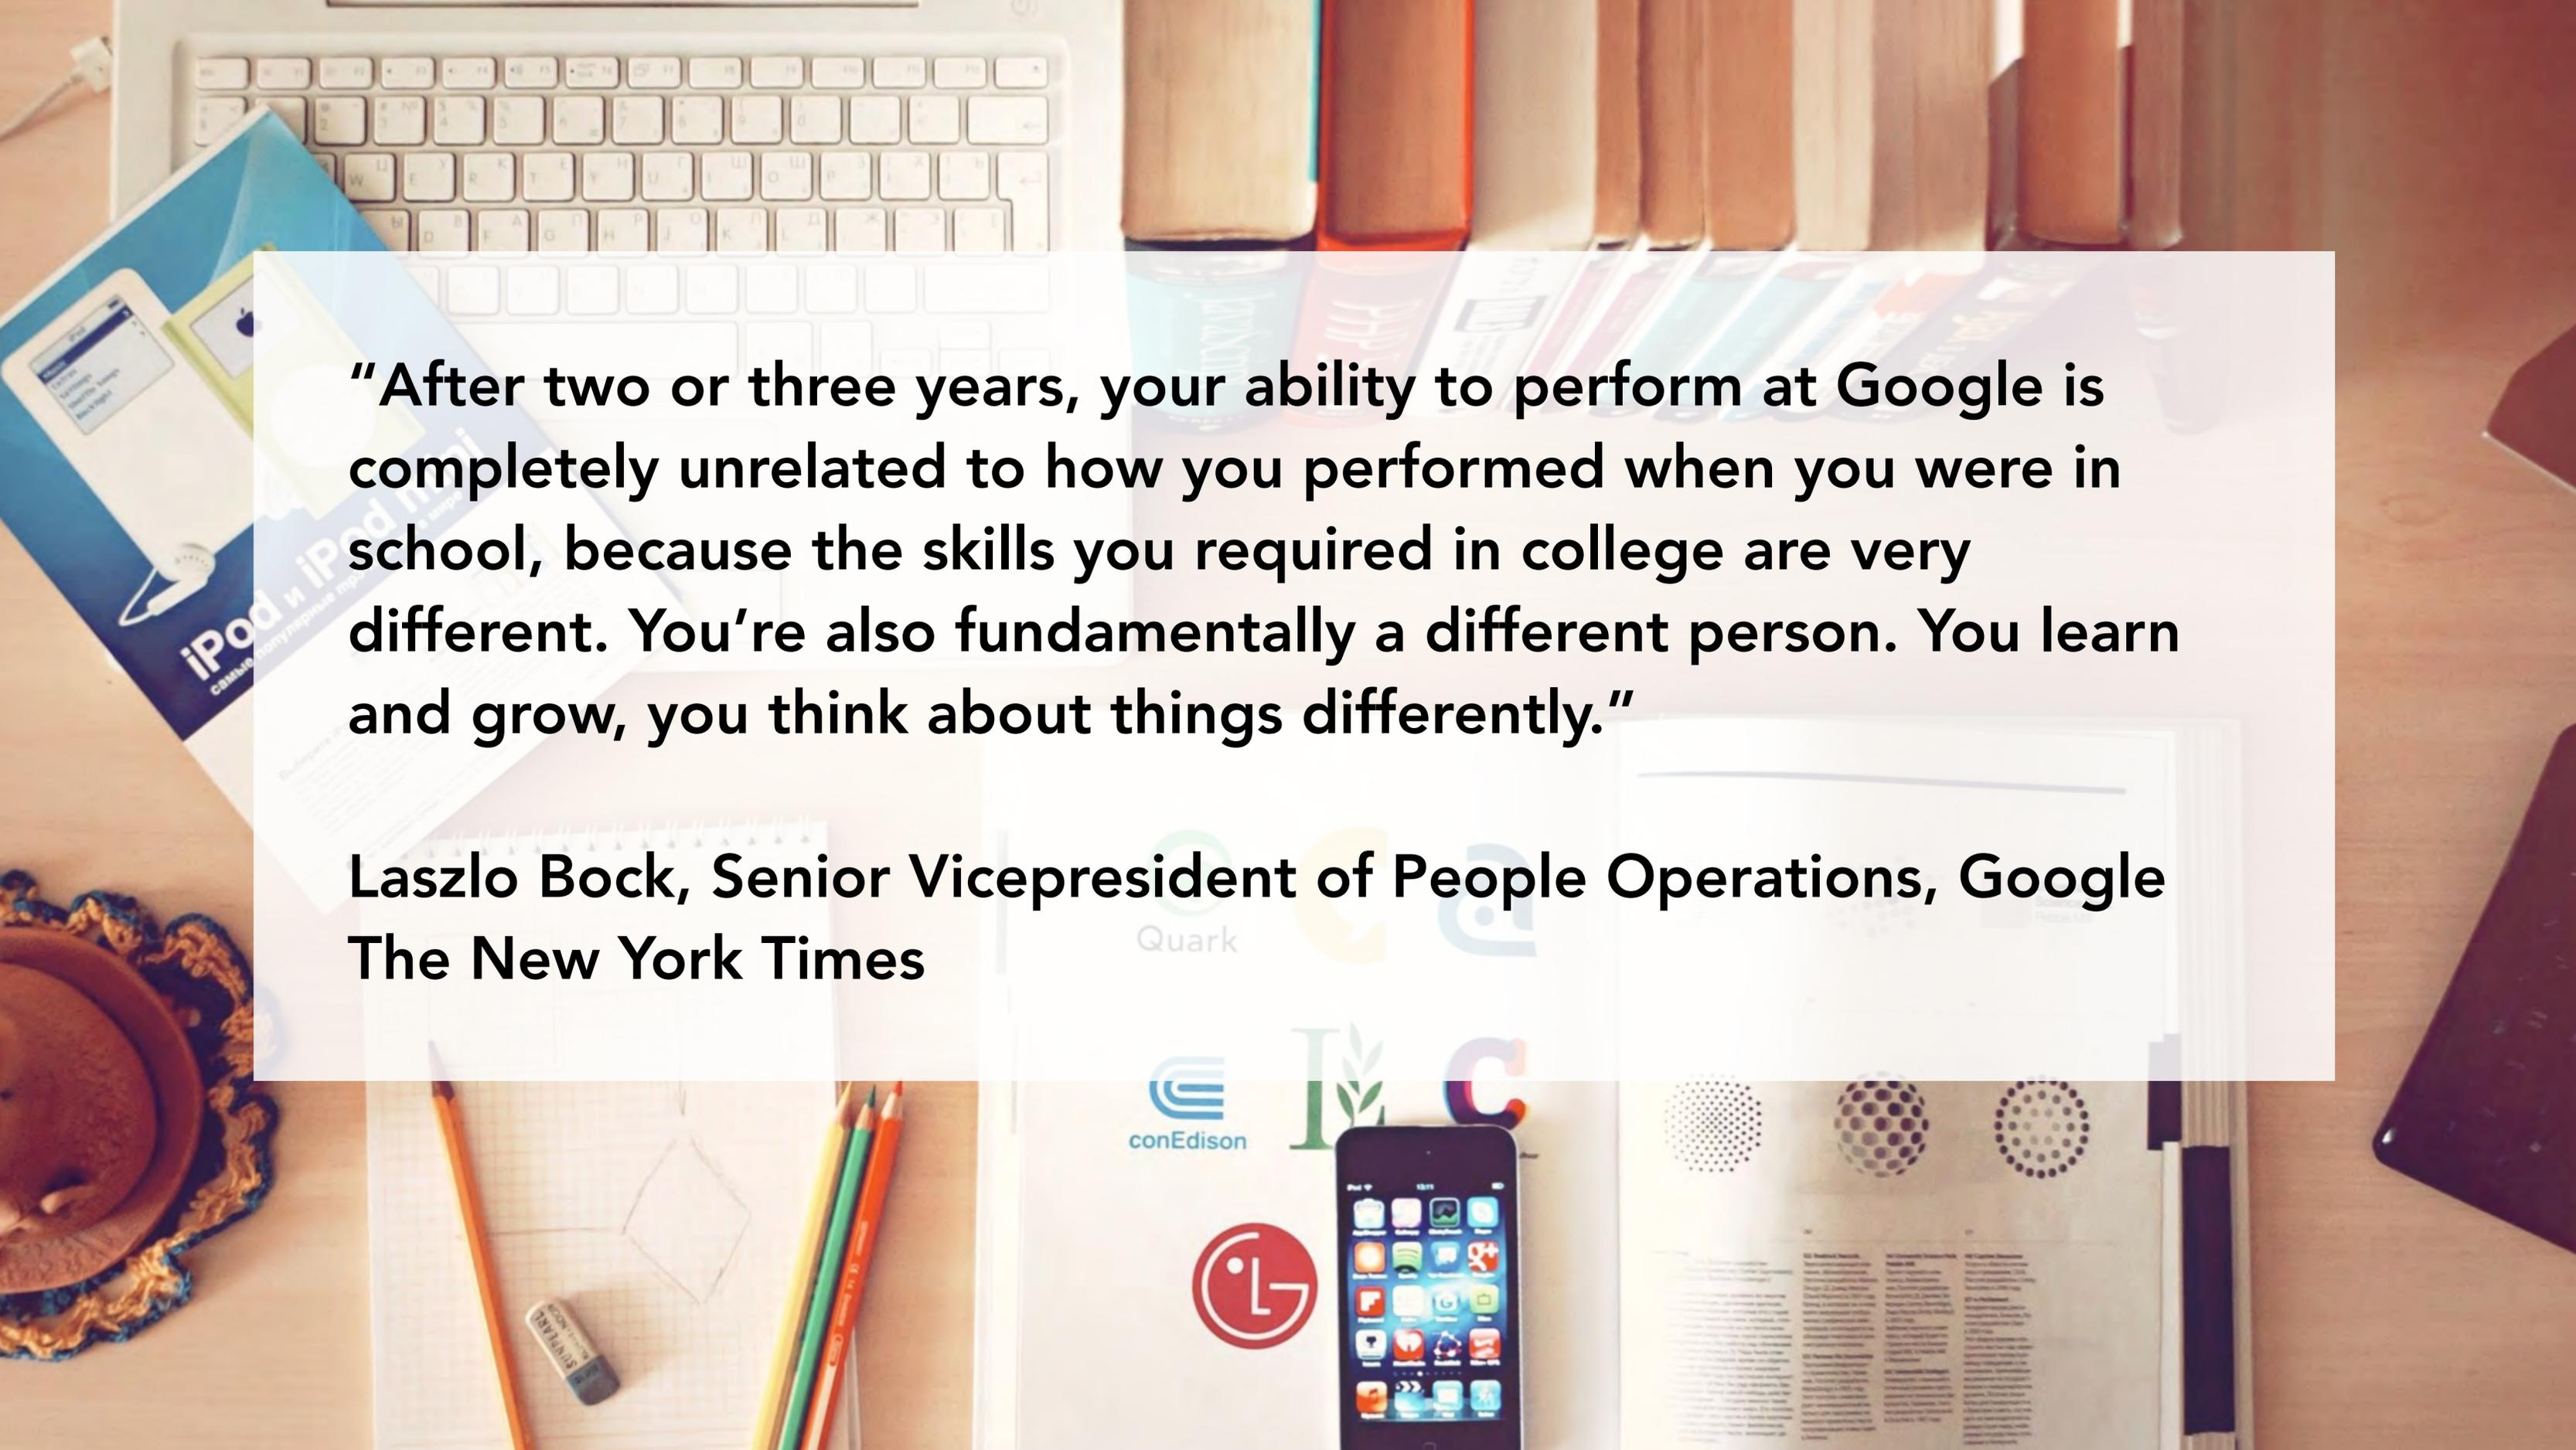

College can be good for learning about what's been done before, but it can also discourage you from doing something new. Each of our fellows charts a unique course; together they have proven that young people can succeed by thinking for themselves instead of competing on old career tracks.

Freedom to get stuff done

Pursue ideas that matter instead of mandatory tests. Take on big risks instead of big debt. How you spend your two years in the Fellowship is up to you — we're here to help, but we won't get in the way.

Our network is yours

The hardest thing about being a young entrepreneur is that you haven't met everyone you'll need to know to make your venture succeed. We can help connect you — to investors, partners, prospective customers — in Silicon Valley and beyond.

A top-down view of a desk. In the upper left, a white laptop keyboard is visible. To its right is a row of several books with colorful spines. Below the keyboard is a blue box for an iPod/iPad. In the center, a white semi-transparent text box contains a quote. Below the text box, there is a notebook with a pencil and a smartphone displaying an app grid. To the right of the smartphone are several logos: Quark, conEdison, and a red circular logo with a stylized 'L'. In the bottom right, there is an open book with text and diagrams.

“After two or three years, your ability to perform at Google is completely unrelated to how you performed when you were in school, because the skills you required in college are very different. You’re also fundamentally a different person. You learn and grow, you think about things differently.”

Laszlo Bock, Senior Vicepresident of People Operations, Google
The New York Times

GAP YEAR

A group of people are working at a long wooden table. In the foreground, a person's hand is holding a black pen over an open notebook with handwritten notes. To the left, another person is writing in a notebook. The table is cluttered with various items: a laptop, a glass of iced coffee, a jar of coffee, a white mug, and several notebooks. The scene is lit with warm, natural light, creating a focused and collaborative atmosphere.

LA EDUCACIÓN COMO SOLUCIÓN

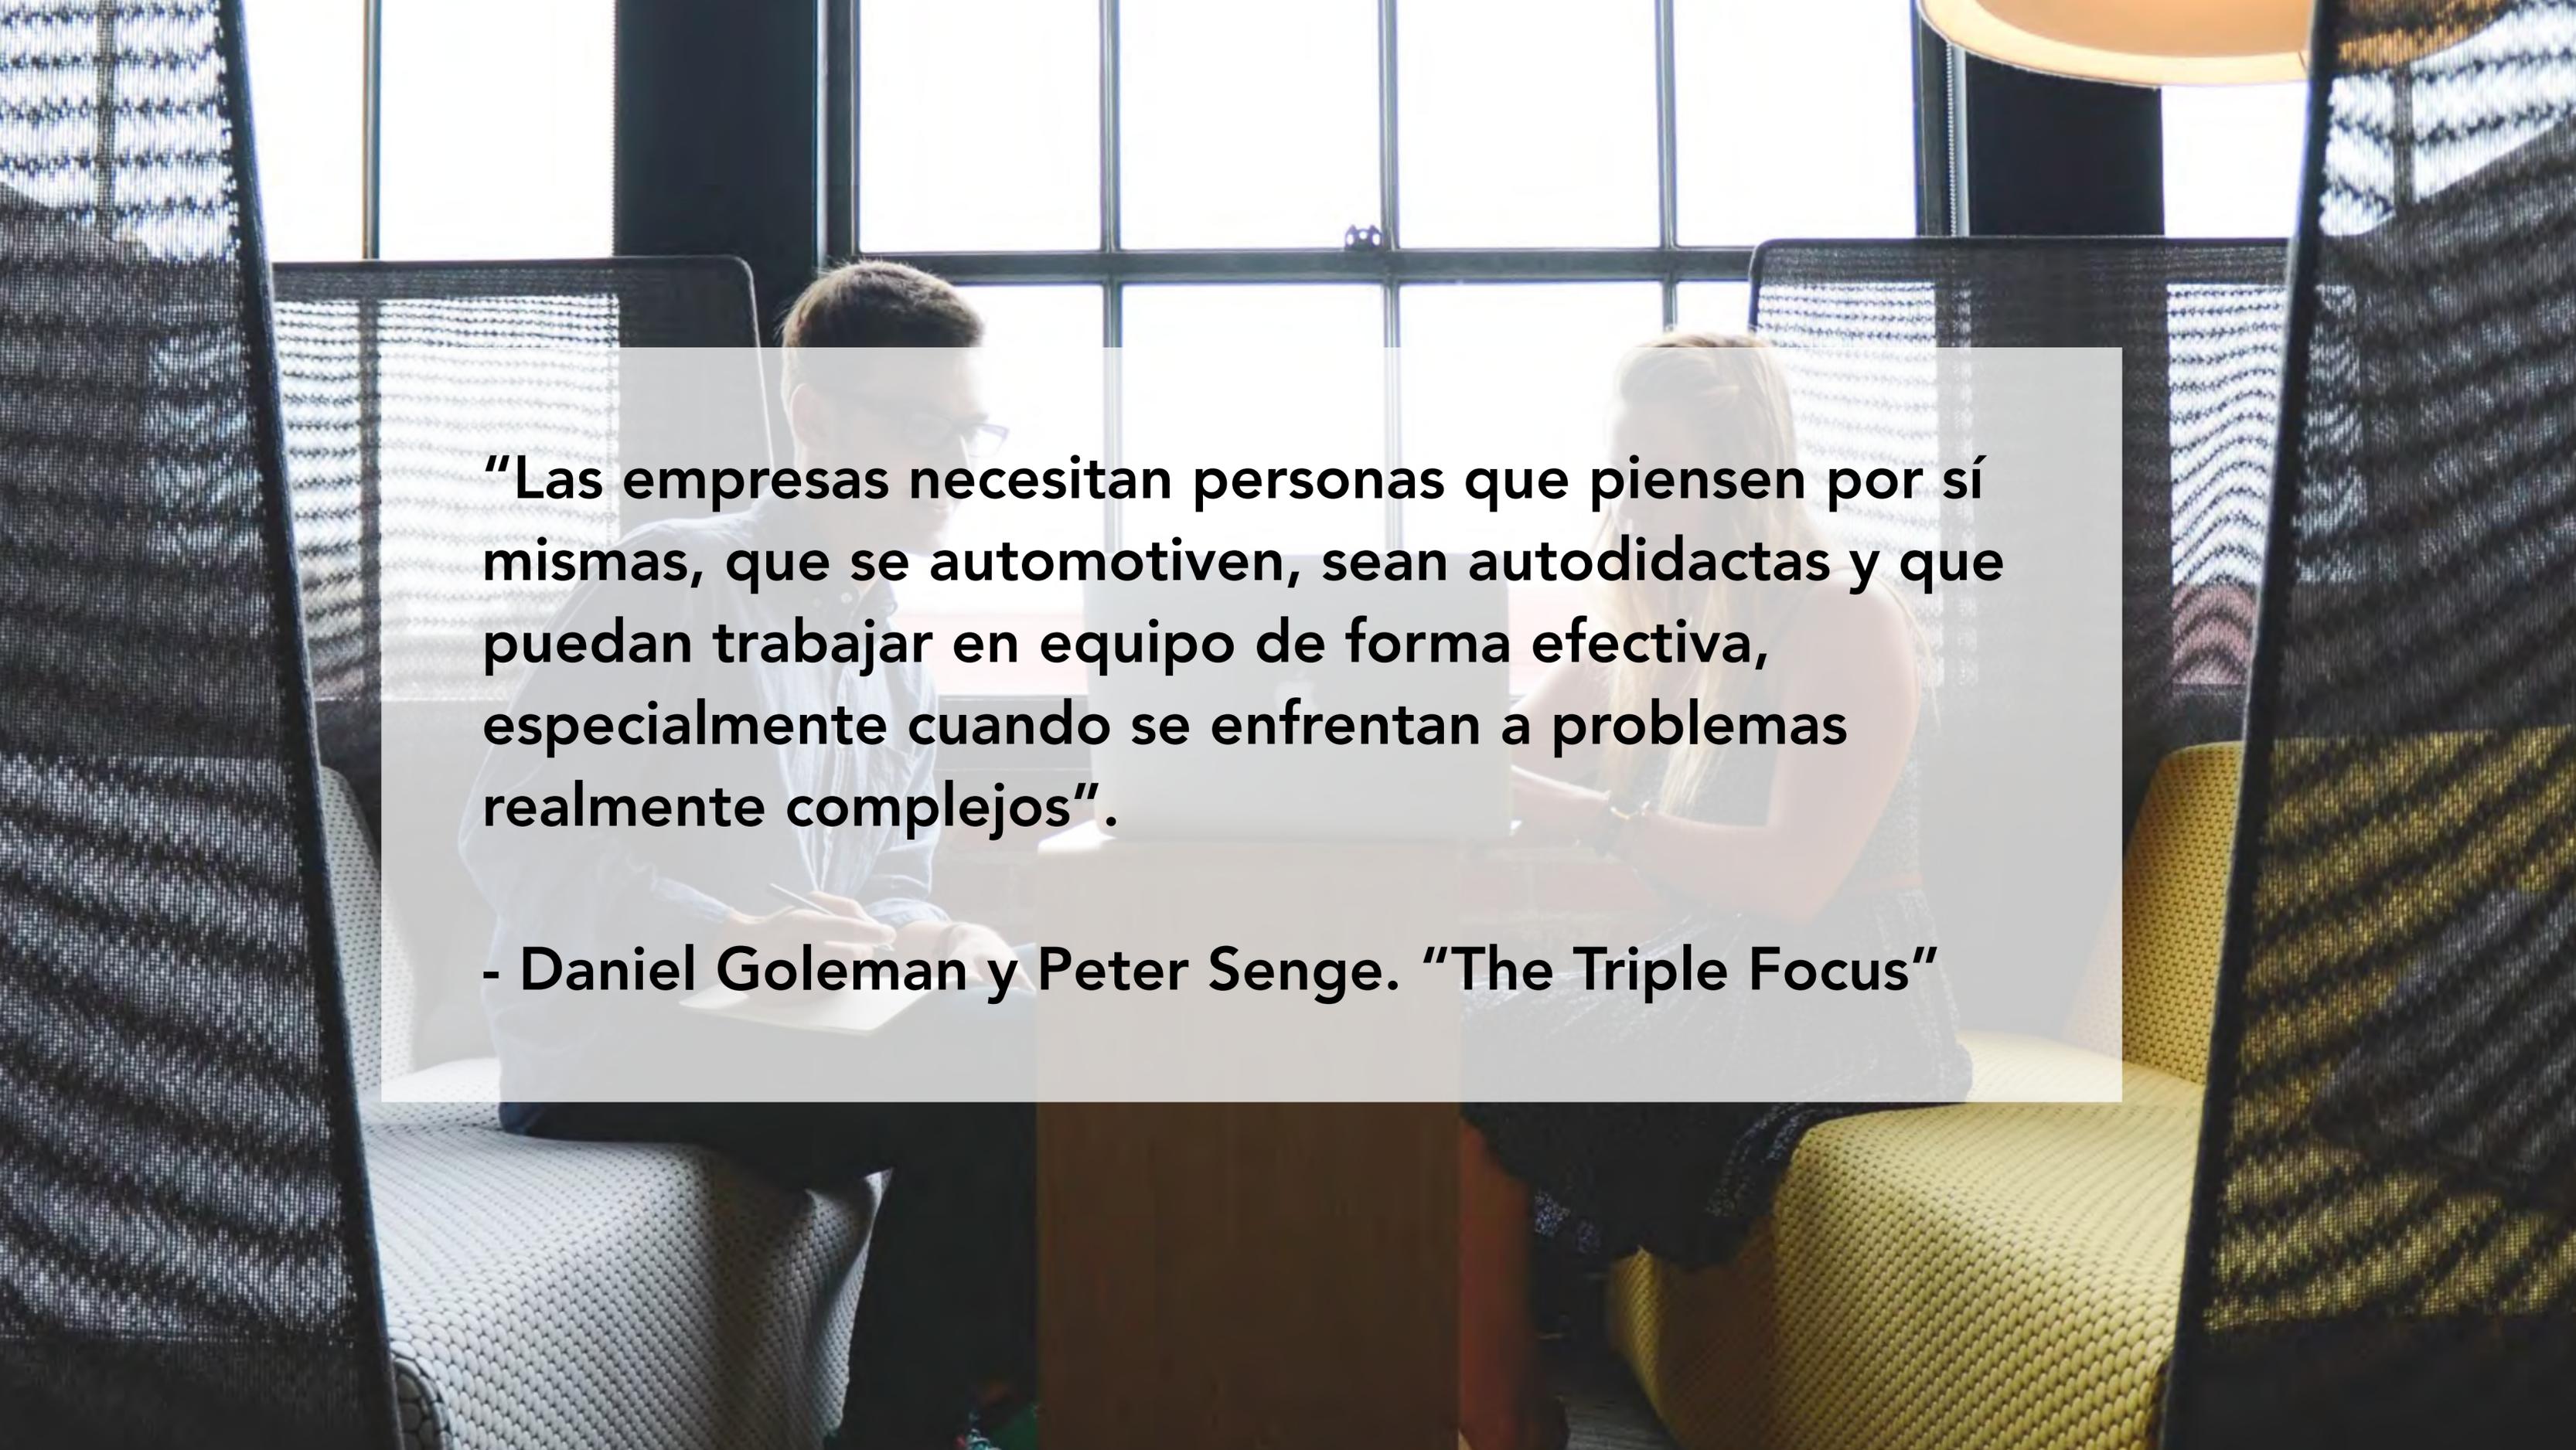

A photograph of a dilapidated, graffiti-covered building. The scene is filled with debris on the ground and various pipes and structures. A white text box is overlaid in the center, containing a quote and a URL. The background shows a mix of concrete, metal, and colorful graffiti, including a large yellow smiley face with eyes.

“By 2025, one in three jobs will be replaced by smart machines.”

“Las empresas necesitan personas que piensen por sí mismas, que se automotiven, sean autodidactas y que puedan trabajar en equipo de forma efectiva, especialmente cuando se enfrentan a problemas realmente complejos”.
